

## **ICMR'22**

Proceedings of the 2022 International Conference on Multimedia Retrieval

Sponsored by:

**ACM SIGMM** 

Honorary General Chair:

Brigitte Kerhervé, Université du Québec à Montréal, Canada

**General Chairs:** 

Vincent Oria, New Jersey Institute of Technology, USA Maria Luisa Sapino, Università degli Studi di Torino, Italy Shin'ichi Satoh, National Institute of Informatics, Japan

Program Chairs:

Wen-Huang Cheng, National Yang Ming Chao Tung University, Taiwan Ichiro Ide, Nagoya University, Japan Vivek Singh, Rutgers University, USA

## ICMR'22 Program Chairs Welcome Message

We are pleased to introduce the technical program of the 12th ACM International Conference on Multimedia Retrieval, ACM ICMR 2022, scheduled to take place June 27-30, 2022 in Newark, NJ, USA. ACM ICMR is the premier conference that covers a broad range of topics related to leading-edge multimedia retrieval technologies of practical use. The conference attracts both researchers and practitioners from all over the World and gathers outstanding works advancing multimedia retrieval with state-of-the-art technologies, which were selected through a highly selective review process.

ACM ICMR 2022 received 217 regular submissions with authors from 28 different countries, including 157 long paper submissions, 32 short paper submissions, and 28 special session paper submissions. After a rigorous review process, 54 submissions were accepted as long papers, 11 submissions were accepted as short papers, and 14 submissions were accepted as special session papers. We also solicited demonstration and doctoral symposium submissions. Detailed statistics are given in the following table.

Venue or Track	Reviewed	Accepted	
Long Technical Papers	157	54	34.4%
Short Technical Papers	32	11	34.4%
Special Sessions	28	14	50.0%

Including all tracks, we recruited 158 technical program committee (TPC) members, who submitted 658 double-blind reviews for the 217 papers (on average, each submission received approximately three reviews). We sincerely thank the TPC members for their contribution in reviewing. We especially recognize 20 of these TPC members as "Outstanding Reviewers" for the quality of their work. A successful program for ICMR 2022 could not be made without the great support of the TPC members.

In addition to the regular technical program, ICMR 2022 has two tutorials, three workshops, one grand challenge, and one reproducibility track paper, which cover multimedia retrieval and analysis from a wide perspective. We enthusiastically acknowledge and thank all those who have contributed to the success of the ACM ICMR 2022 conference and hope that you will enjoy the conference.

Wen-Huang Cheng, National Yang Ming Chao Tung University, Taiwan

Ichiro Ide, Nagoya University, Japan
